

Proscenic i10 Cordless Vacuum Cleaner

Features of Proscenic i10

1. Powerful Suction for Thorough Cleaning

Empowered by a high-efficient 350W motor, it can generate a high rotation speed of 80000 rpm and large suction of up to 25000 Pa to effectively deep-clean any stubborn dirt and dust on the surface.

2. Super Long Run Time

With 8 2200-mAh large-capacity batteries installed, the i10 can run continuously for a maximum of 50 minutes, sufficient for cleaning the entire house in one go without needing to recharge or change the battery.

3. Detachable Battery and Flexible Charging Methods

The battery of the Proscenic i10 Cordless Vacuum Cleaner is detachable so that its run time can be further extended by having a second battery ready. Besides, the machine can either be charged through the charging base or take out the battery to charge separately.

4. LED Touch Display

A LED touch screen with a high-resolution interface is built on the top of the main unit to allow users to easily change working modes and be immediately notified of information about the machine's current status, including the battery levels and error alerts.

5. VBoost Technology

With an advanced infrared sensor designed and installed on the brush head, its suction power will automatically and intelligently boost to the highest once carpets are detected to effectively remove tough dirt or dust. Once finishing cleaning carpets, it will return to the normal suction level to avoid battery draining.

6. Three Working Modes

There are three working modes (Auto mode, Eco mode and MAX mode) to be chosen based on different cleaning scenarios. In Auto mode, the machine will adjust its suction power to the optimal level when cleaning on different types of floors and different sizes of dirt. Once Eco mode is selected, it will run on the lowest noise level and maximum battery life with minor suction power. By contrast, the full suction power can be activated when MAX mode is turned on.

7. Led Headlights Illumination

The machine's brush head has been equipped with LED headlights to provide users with a bright and clear view of dark spots such as the space underneath the couch or bed, ensuring that there are no dirt and dust hidden in these invisible areas.

8.Versatile Brushes for Various Cleaning Scenarios

The Proscenic i10 Cordless Vacuum Cleaner is supplied with several auxiliary brushes. Firstly, the Mini Motorized Brush is specially designed for removing dust and mites on beds, sofas and pillows. Likewise, the round brush with an extension tube is ideal for cleaning dust and hair accumulated in high places such as the top of curtains or bookshelves. In addition, with the Long Crevice Nozzle attached, it can effortlessly fit in narrow spots such as corners and the space between sofa cushions.

9.Multiple Stages Filtration System

With four stages of filtration on the dust container, it can capture and lock in 99.99% of fine dust and particles as small as 0.3 micrometers in size while circulating fresh air back into the environment. That substantially helps alleviate health issues, especially for those suffering from asthma, allergies and other respiratory diseases.

10.Applicable to Multiple Floor Types

Featuring multi-functional auxiliary brushes and immense suction power, the i10 Cordless Vacuum Cleaner can work perfectly on any type of flooring (including carpets and hard floors) without leaving scratches and damages.

Target User Group

22-45 years old, with obvious occupational characteristics, such as doctors, clerks, office workers who have worked for several years.

SPECS

- Power: 350W
- Voltage: 28.8V
- Runtime: 50 min
- Battery: 8*2200mAh
- Color: Blue
- Suction Power: (Max mode) 23000-25000 PA
- Suction Power: (Auto mode) 12500-20500 PA
- Suction Power: (Eco mode) 8500 PA
- Rotating speed: 80000rpm
- Noise in Decibels (dB) 70dB-78dB
- Dustbin Capacity: 0.65L
- Filtration System: 4 Stages HEPA Filtration System
- Charge Time: 180 mins
- Accessories: Adapter; Long Crevice Nozzle; Round Brush
